SUMMARY

Computer Engineering graduate and full-time Researcher at TÜBİTAK BİLGEM with experience contributing to multi-module research and development projects and taking ownership of critical components. Progressed from Scholar to Part-time Researcher and then to a full-time role, with responsibility for delivery, defect resolution, documentation, and technical continuity.

EXPERIENCE

TÜBİTAK BİLGEM

Gebze, Kocaeli, Türkiye | On-site

Researcher Aug 2026 - Present

- Automated technical document generation, reducing the time required to produce new documents from several days to a few hours.
- Took ownership of several components in a multi-module project, delivering new functionality, resolving defects, and serving as the primary point of contact for those components.

Part-time Researcher Jun 2025 - Aug 2026

- Developed and tested low-level networking functionality on Linux devices, covering FMC, packet filtering, packet ordering, and CPU core isolation.
- Resolved packet-reordering issues through packet-flow controls and CPU core isolation.
- Built a GUI-based network impairment test environment around the Linux netem command, making repeatable test scenarios easier to configure and run.

Scholar Feb 2025 - Jun 2025

- Developed Java backend services with Spring Boot and Hibernate, implementing relational database integration and persistent data storage.

ASELSAN

Ankara, Türkiye | On-site

Intern Aug 2025 - Sep 2025

- Built a Rust-based client-server communication application over TCP/IP sockets, supporting concurrent multi-user sessions through a turn-based, radio-style communication flow rather than conventional chat.
- Implemented an optimized file-sharing flow between active user sessions.

Tovivu

Gebze, Kocaeli, Türkiye | Remote

Backend Developer Intern Jun 2024 - Aug 2024

- Developed RESTful APIs that enabled efficient and secure data exchange between clients and servers in distributed applications.
- Designed and optimized relational database schemas to support API endpoint integration and efficient data management.

IEEE Gebze Technical University Student Branch

Remote

Mobile Application Team Backend Developer Jul 2022 - Jun 2024

- Developed backend functionality for the IEEE GTU mobile application, enabling the delivery of campus updates, academic calendars, announcements, and events to students.

EDUCATION

Gebze Technical University Oct 2021 - Jun 2026
Bachelor of Science in Computer Engineering | GPA 3.62 / 4.00 | Kocaeli, Türkiye

42 Kocaeli (Ecole 42) Jul 2022 - Present
Peer-based Software Engineering Program | Bilişim Vadisi, Kocaeli, Türkiye

CERTIFICATION

English B2 | PTE Academic Certificate, Aug 2023
